ELSTEEL

MISSION

Core Values

- Quality
- Corporate social responsibility
- Continuous improvement and innovation
- Honesty, trust and loyalty

Core Purpose

Power to the planet!

Through sustainable technical solutions.

Vision

To manufacture 100% sustainable products

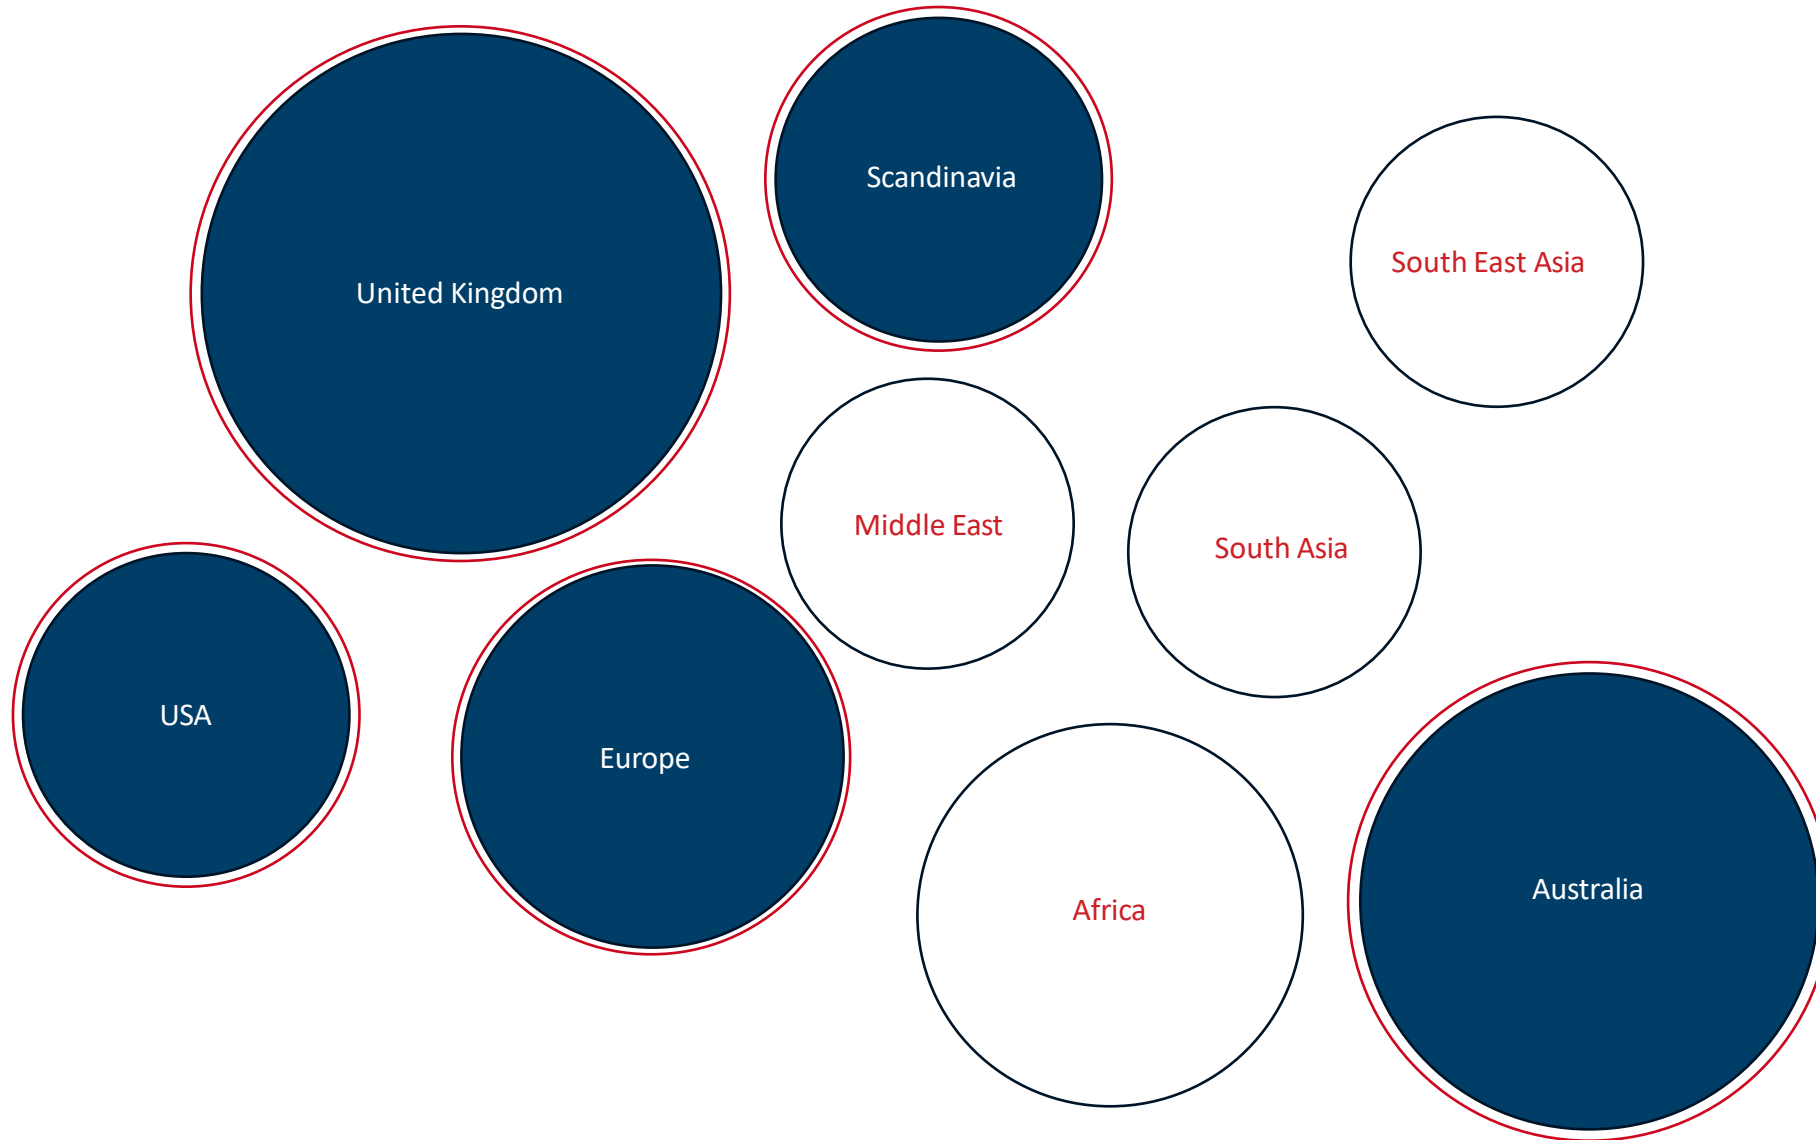

Elsteel will be a profitable company that is focused on research, development and innovation of low voltage panel systems that are manufactured without burdening our environment.

Elsteel will be a role model that inspires other companies. Made by Elsteel will be equivalent to a high quality, guilt free product that is sustainably manufactured.

Being a part of the Elsteel family; be it employee, customer or supplier, means we make our best effort in working together towards a business world that is sustainable and that we can be proud of passing on to future generations.
